## How to get rid of fruit flies, easily, cheaply, safely & effectively.

Here's the recipe: First, take a wide mouth jar and fill it 1/2 way full with **apple cider vinegar**. Add a few drops of dish soap, and then fill the rest of the jar with water until there are bubbles in the jar... place the jar where the fruit flies are and watch them appear. Drawn by the scent of the vinegar, the fruit flies get caught in the bubbles and die. When the bubbles disappear, dump some of it out and fill it with a little more water. Keep changing out your jar periodically until they're all gone — it'll generally take between 24 and 48 hours to get rid of all of them.

## **Laundry Room Reminders**

When doing laundry, please do not leave your personal property unattended. WHA is not responsible for lost, stolen or damaged items.

Also, please do not use POWDER detergent. Liquid or pods only, as powder doesn't dissolve properly, can clog the machine and damage other residents clothing.

## **Maintenance Reminders**

Please keep in mind that if there are issues with things being broken or not working properly in the buildings, there is no way for Maintenance to know unless you call the work order in. Even if you think someone else may have called it in, please take the time and call it in as well. Thank you! 782-1251
